## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Akizawa et al. (US 5,009,355) in view of Scheuten (US 5,385,287).

With regard to claim 1, Akizawa et al. discloses a stapler (A) comprising: a clincher unit (B) comprising a clincher (38), a holder (36, 37) which holds the clincher (38) a slanted guide surfaces (36a).

Akizawa et al. disclose all claimed features except a holder configured to be moveable in the clincher unit through press contact between the guide surface and the leg of the staple.

Scheuten teaches a moveable clincher holder (24) in clincher unit (3), and capable of being moved through press contact between guide surface and the leg of a staple when staple leg is guided along the guide surface.

Therefore, it would have been obvious to one skilled in the art at the time of the invention to modify the holder of Akizawa et al. by providing a moveable clincher holder as taught by Scheuten in order to improve the frictional conditions between the pushrod and the bending elements, and attain a long service life of the clincher unit. See (col. 1, lines 26-29).

Art Unit: 3721

With regard to claim 2, the modified Akizawa et al. would include a driver unit comprising a driver wherein the driver unit and the clincher unit are vertically separated as disclosed in reference of Scheuten. See (Fig.1)

With regard to claims 3 and 6, the modified Akizawa et al. would include a pair of clincher members disposed rotatably relative to the holder and a partition plate disposed between the clincher members as disclosed in reference of Scheuten. See (Figs. 2 and 3)

***Allowable Subject Matter***

Claims 4-5 and 7-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments with respect to claims 1-3 and 6 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3721

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
